Background for having Marine as a separate segment

Marine is a strong and prioritized global platform where Dometic supplies the global marine industry with a wide range of innovative products for both the leisure and professional markets. Marine has been a subsegment in segment Global since the beginning of 2021, and during the year a true global business has been established. With a strong market position as a basis and by driving continuous innovation, Dometic has the ambition to grow this business further globally.

New segment structure from the reporting of Q1 2022

- Americas
- APAC
- EMEA
- Marine (previously included in segment Global)
- Global (consists of "Other global verticals" and "Igloo")

The segments will be measured on EBITA before amortization of acquisition-related intangible assets and items affecting comparability starting from the reporting of Q1 2022.

Introduction of Adjusted EPS

Starting from the first quarter of 2022 Dometic will start reporting an Adjusted Earnings per share (Adjusted EPS) measurement as a complement to the existing EPS. The Adjusted EPS excludes the impact from amortization of acquisition-related intangible assets and items affecting comparability.
