PRESS RELEASE

Dometic strengthens its RV mobile power solution with Büttner and NDS products

Düsseldorf, Germany – August 27, 2022

With acquired brands, Büttner Elektronik and NDS Energy, Dometic complements and strengthens its mobile power solution portfolio. Dometic can now offer complete solutions from batteries and inverters to solar modules for self-sufficient travels in all vehicle sizes.

BÜTTNER |  **DOMETIC**

NDS |  **DOMETIC**

Having a self-sufficient power solution even outside of the power-grid hugely expands the opportunity for RV owners to enhance the outdoor lifestyle, providing a new level of independence.

Dometic has identified this increasing need and invested to support the growth in this market.

With recently acquired brands, Büttner Elektronik and NDS Energy, Dometic complements and strengthens its mobile power solution portfolio for RVs and motorhomes. Dometic offers complete power electronics for all vehicle sizes, demands and budgets.

Lithium and AGM batteries

Complete range of lithium batteries – from 40 to 300 Ah

PLB40: Portable LiFePO4 power station with integrated AC/DC charger, 2 x USB ports and 2 x 12 V ports.

MT lithium batteries: High discharge currents and smart Battery Management System for hassle-free inverter operation, even at higher output power levels.

TEMPRA lithium batteries: 50% more capacity in a standard case, compatible with any charger, Bluetooth app and heating function available.

Green Power AGM batteries: From 65 Ah to 250 Ah, specially designed for RV use, 40% more autonomy, 1200 cycles, maintenance-free.

Inverters & battery chargers

Complete range with all performance categories, from entry-level to premium, with or without CI bus.

Battery chargers: From 10 A to 80 A (12 or 24 V models). Universal chargers suitable for all types of batteries.

2022

PRESS RELEASE

Inverters: From 150W to 3.500W, with and without integrated mains priority circuit. 230 V on board – modified or pure sine wave output voltage.

Compact design, energy-saving operation, special

standby mode with automatic start and CIBUS

Solar modules

Wide choice of solar modules and complete systems – rigid and flex panels, from 65 Wp to 210 Wp.

CDS Power Line: 44 monocrystalline cells – efficient even with partial shading

Power Line: 40 monocrystalline cells – special front glazing for better light absorption.

Black Line: 72 monocrystalline cells – good low-light performance.

Black Solar: monocrystalline cells with energy-efficient PERC technology, total black appearance, integrated mounting frame.

Solar Flex Evo: ultra-light, ultra-flat, 30% flexible – ideal for high-roof and pop-up roof campervans.

Flat Light: super-flat and robust, can be walked on.

Charging boosters & Power Unit

Charging boosters: From 10 A to 90 A. Ideal for vehicles with EURO 6 emission standard. Available in wide range – for all types of batteries and for all installation methods.

Power Units: Available in 4 capacity classes – 85 Ah / 105 Ah / 120 Ah / 180Ah. A smart solution to expand existing AGM battery capacity with lithium battery power. Equipped with integrated battery computer controls the use of both batteries. Existing charging system can be used.
