## Dometic launches next-generation RV air conditioners

Düsseldorf, Germany – August 27, 2022

Dometic's next generation rooftop RV air conditioner features fresh design, superior cooling performance, optimized air flow, and surprisingly quiet operation. The first models of the new Dometic FreshJet FXJ series are ready for market launch. At this year's Caravan Salon show in Düsseldorf, Dometic presents two highly efficient electronic models and an entry-level version with mechanic controls.

Dometic makes first market introduction of its next generation rooftop RV air conditioners.

The two electronic Dometic FreshJet FJX models (1700 and 2200 watts) set new benchmarks in mobile air conditioning. Powerful and efficient, the new-generation

roof air conditioners cool down the cabin in record time with minimal energy consumption, and superbly quiet. The integrated air purifier system effectively filters out bacteria and unpleasant smells. Everyone on board can enjoy a peaceful night's sleep and wake up to a new day full of energy.

To achieve the new level of comfort and performance, the Dometic engineers redesigned the Air Distribution Box fitted inside on the cabin ceiling. The air flow system is optimized to improve efficiency and minimize noise, and size and shape of the air vent blades were altered to allow convenient fingertip adjustment of the air flow direction. A beautiful ambience light adds the finishing touch to the new air distribution unit.

For exterior, the FreshJet FJX features modern and fresh design of the aerodynamically shaped rooftop unit.

Equipped with smart connectivity features, the electronic FJX air conditioners enable convenient remote control of from a smart phone or tablet computer. They are also ready for connection to Dometic's premium wall thermostat for future integration into the company's upcoming "Full Climate" solution. This smart all-in-one system will combine heating, air conditioning and ventilation to give RVers the best holiday climate and unprecedented ease of use.

In addition to the electronic models, Dometic also presents an entry-level version with mechanic controls. With a cooling capacity of 1500 watts, this competitively priced roof air conditioner provides an energy-efficient solution for small and medium-sized RVs. It features the new FreshJet FJX design and comes with all essential basic functions. Dometic's air purifier system can be retrofitted on request.

Detailed information about the new Dometic FreshJet FJX series is available at [www.dometic.com](http://www.dometic.com) and products will be available in Q1 2023.
