PRESS RELEASE

Dometic introduces new spacious 90L models RV fridges with unique features

Düsseldorf, Germany – August 25, 2023

For variety of installations and usages onboard, Dometic introduces two new 90L RV fridges. One with Dometic's iconic double hinged door unit combined with detachable compressor for space-saving. And the other one with 3-in-1 solution that means the unit can be used as fridge or freezer or both at the same time.

Dometic RC10.4 M90 Compressor Fridge

Dometic's iconic 10 series campervan fridge features popular double hinge door for versatility in use and convenience. The new spacious 90 litre model adds another unique feature – detachable compressor unit and control panel.

By separating compressor unit and monitor, the generous 90 litre unit can neatly fit under the countertop. Where space is limited, the control panel and/or the compressor can be detached and installed elsewhere in the vehicle.

The new RC10.4 M90 unit still features double-hinged door that opens left and right, a removable freezer compartment and a powerful cooling unit which RVer can rely on even when travelling in hot climates.

The new campervan fridge is available in the market.

Key features:

- Double-hinged door – opens left and right without the need to change the hinge
- TFT control panel and/or compressor unit can be installed separately
- Reliable cooling and deep-freezing – even at extreme ambient temperatures up to 43 °C
- Elegant aluminum door handles extend over the complete fridge height

2023

PRESS RELEASE

- Patented removable freezer compartment (opens to the bottom)
- Ease of use with intuitive TFT color display and turn/push button
- Pleasantly quiet operation in night mode, fast cool-down with boost function

Dometic NRX 90V

Dometic's latest compressor technology achieved drastic saving in energy consumption compared with same size of absorption refrigerators.

The model designed to replace Dometic 5- or 8-series absorption refrigerators with same dimensions.

New Dometic NRX 90V also features

unique function – 3-in-1 solution. This means the unit can be used as fridge, freezer or both at the same time.

Fresh design, superior energy efficiency, this new generation compressor refrigerator provides 90 l of cool storage. The elegant frameless door opens to a versatile interior. You can easily remove the freezer compartment to use the full cabinet capacity for refrigeration or deep-freezing.

- 3-in-1 solution: fridge, freezer or both at the same time
- Energy-efficient compressor technology consumes only one fifth of energy compared to

an absorption fridge of the same size. This means the daily saving would run a 40W bulb for 53 hours or a cost saving of 2€ per day, assuming the kilowatt hour price of 1€ - common on camping lots.

- Easy installation without cut-outs, ventilation grills and gas installations
- Frameless door with black front panel and full-width handle
- Reversible door hinge – can be fitted left or right as required
- Dual function locks can also act as vents
- Standard or flush-mount frame available as accessory
