RELEASE

2026 sees increased range of Dometic Tour Awnings – seven new models released.

Düsseldorf, Germany – August 30, 2025

Introduced last year with the innovative Weathershield Tour fabric—a durable, dope-dyed 300D ripstop polyester—the Dometic Tour awnings range has quickly gained popularity among RV road trippers and tourers across Europe. Building on this momentum, Dometic is set to expand the lineup for 2026 with seven new models, offering more variety and versatility to outdoor enthusiasts.

Dometic announces expansion of its Dometic Tour range with new models and variants for 2026.

Key to the Dometic Tour Awning Range is Weathershield Tour material, a dope-dyed 300D ripstop polyester. The dope-dyed manufacturing process increases the UV colour resistance and ensures that your awning remains vibrant and bright use after use. The dope-dyed material is manufactured more sustainably than the traditional polyesters, using 80% less water which in turn reduces energy consumption. The material also includes a Ripstop weave, which ensures tougher durability to withstand anything your adventure or the weather happens to throw at you.

The Dometic Residence Tour awnings – Full size caravan static awnings - have been increased from 6 to 10 models. Additional sizes are at both ends of the range – Size 9, 10 and 17, 18.

In addition to the Residence, Dometic have introduced Club Air into the Tour range. This will be available in three sizes – 260 S/330 S/390 S.

The Club Air Tour will retain all the features from the previous models such as, single point inflation for easy set up and take down, multi height adjustment to adapt to different terrain and vehicles, apex ventilation to keep condensation at bay, dual pitch roof for maximum headroom and to disperse rain water and removable front panels to give versatility.

The overall aesthetic has changed to a modern and bright color with matching AIR poles, valves and connectors. For the

RELEASE

Dometic Residence AIR Tour and Dometic Club AIR Tour Awnings, a 3-side canopy is added to provide rain shelter above all entrances, for comfortable access to the awning no matter the outside conditions.

Both inflatable and poled Dometic Tour Awnings now come with new QuickPitch straps, helping you set up shelter in lightning speed by reducing the number of pegging points required to secure the awning. The straps match the overall color scheme and use reflective stitching to improve visibility at night. It's perfect for RV road trippers and tourers seeking a weekend getaway in nature.

The new Dometic Tour Awning Range also comes with innovative design changes. The upgraded panoramic windows guarantee lots of natural light – letting you soak up mother nature's panoramic views. For those seeking a little more privacy - the new fabric curtains give a softer touch and have better daylight shielding, whilst the slide track is improved to make it easier to open and close. The new curtain hooks also makes them simple to remove and wash when ready for your next trip.
