RELEASE

Dometic 'Stay' awning: where hybrid fabric innovation meets long-stay leisure.

Düsseldorf, Germany – August 30, 2025

Dometic unveils its new premium awning range, the 'Stay' series, at Caravan Salon 2025. Featuring an industry-first hybrid combination material, the 'Stay' range is designed to replace the existing 'All Season' line. It blends the robust performance of its predecessor with the modern design DNA and innovative features of the successful 'Tour' range launched last year.

Introducing a **new to the industry** hybrid combination, the Dometic 'Stay' is designed for longer holidays and has had a fabric overhaul combining the **lightweight performance** of

polypropylene, as introduced on the new Dometic poled awning, with the **natural breathability and comfort of polycotton**, resulting in a significant upgrade for outdoor enthusiasts and holidaymakers.

The new stay awnings combine a polypropylene roof which has natural properties that repel moisture minimising condensation collecting on the fabric, thus allowing any moisture to escape naturally through the truly breathable polycotton walls.

The polypropylene roof fabric is dope dyed and UV resistant to ensure colour steadfastness and longevity in the sunshine. The polycotton walls are lighter weight than the previous models and have a ripstop weave to ensure comfort and durability whatever the adventure or weather throws at you.

As with the trusted 'Tour' range the upgraded panoramic windows guarantee lots of natural light – letting you soak up mother nature's panoramic views. For those seeking a little more privacy - the new fabric curtains give a softer touch and have better daylight shielding, whilst the slide track is improved to make it easier to open and close. The new curtain hooks also make it simple to remove and wash when ready for your next trip.

RELEASE

This **new material innovation** is being rolled out across **four key models – Residence/Grande/Rally/Sunshine** and comes in **11 versions**, ensuring a wide range of options to suit every type of vehicle and adventure.

Key Features of the New Material:

- **Polypropylene roof** giving durability with lighter weight and equal performance with the added benefit of being recyclable
- **Fully breathable fabric walls** with an increased **cotton ratio** for enhanced comfort.
- **Lighter weight:** 280gsm vs the previous All Season 310gsm.
- **Ripstop construction on walls:** Ensures durability and tear-resistance, consistent with the trusted Tour range.
- **Water repellent and PFC free:** Environmentally responsible treatment

- **Updated design and colourway:** A modern aesthetic refresh to complement evolving customer preferences.
- **Larger windows:** Offering better natural light and outdoor visibility.
- **Updated canopies:** Redesigned for the Residence models to improve form and function.
