## Built for the Cold: Dometic's rugged Winter AIR Awning just got even better.

Düsseldorf, Germany – August 30, 2025

**Dometic announces updates to the Winter AIR PVC 180 S/M, a rugged high-performance inflatable awning built for winter touring in even the most extreme environments. New features for 2025 are: Redesigned size, larger windows, multiple access points, upgraded curtains, glove-friendly zippers and comes with the groundsheet included.**

Designed for caravans and motorhomes, the Winter AIR PVC 180 is available in a new width of 180cm and in 2 height sizes, S/M, for most applications for caravans and motorhomes. The Winter Air combines ultra-durable materials, intelligent design, and Dometic's market-leading AIR Frame technology—delivering reliable shelter for adventurers who refuse to let cold weather stop them.

With new larger windows and a new opening front door that can let in the light during those darker months, the Winter Air awning is the perfect choice for those cold sunny days.

Available from Dometic preferred partners from October 2025 in preparation for the winter season.

### New for 2025

- **Redesigned awning size** to reduce pack size and allow ease of use and transportation
- **Increased window size** for better visibility and natural light

#### About Dometic

Dometic is a global outdoor tech company on a mission to make mobile living easy. Leveraging our core expertise in cooling, heating, power & electronics, mobility, and space optimization, we empower more people to connect with nature and elevate their sense of freedom in the outdoors. We achieve this by creating smart, sustainable, and reliable products with outstanding design. Millions of people around the world use our products while camping and exploring nature with their cars, RVs, or boats. Our range of offerings includes installed products for land vehicles and boats, as well as standalone solutions for outdoor enthusiasts. We employ approximately 7,000 people globally and sell our products in

#### Built to Withstand Winter

##### **Weathershield™ PVC**

Constructed from ultra-durable 400g/m<sup>2</sup> PVC, this high-performance material is waterproof, long-lasting, and easy to clean. Purpose-built for cold climates, Weathershield™ PVC is rated to -20°C, making it the ideal fabric for winter touring.

##### **AIR Frame Technology**

The Single Point Inflation AIR Frame system allows the entire awning to inflate from one external valve. This creates a robust, stable structure while dramatically simplifying setup—even in tough weather.

##### **Dual-Pitch™ Roof System**

The intelligently angled roof helps deflect wind and shed rain or snow, preventing pooling and enhancing the awning's aerodynamic performance.
