SHELTER & TENTS

We love the outdoors. As pioneers in the mobile living arena, we are committed to driving sustainability in our industry. Because we want nature to be a resource for everyone to enjoy and explore. Forever.

The new Weathershield Redux material used on our Redux tents and shelters is an important step towards our collective goals. Plastic waste is a major environmental issue but we can play our part by turning a problem into a solution. The material name, Redux, meaning ‘brought back’, hints at the responsible construction of our new awnings, tents and furniture. Weathershield Redux is made from 100% recycled plastic bottles and is Global Recycled Standard certified. This new material is only one of the many ways Dometic is ensuring future sustainability across the whole company, to balance our environmental, economic and social impact.

We’re now on the move to a better tomorrow, but we’re not there yet.

The Dometic TRT 120E can be set up in a matter of minutes thanks to its powered 12V operation and remote control (included). A peaceful night’s sleep is guaranteed with its 5 cm thick, high density foam mattress which is big enough to comfortably fit two people. Entering the tent is easy thanks to the lightweight, telescopic aluminium ladder.

EXPERIENCE MORE

Built for the outdoors, the Dometic TRT 120E features a two layer construction, suitable for even the most remote destinations in the middle of winter. The TRT 120E’s robust design is further enhanced by a durable water resistant PVC tent cover with a UPF 50+ protection rating, and can handle just about anything that is thrown at it. Thanks to the double layered windows with integrated fly screens, you can get plenty of airflow through the tent while keeping insects out. Despite the robust construction of the TRT120E, its frame is made from lightweight aluminium alloy. Setting up the TRT 120E is simple with a 12 V operation and wireless remote control that assembles the tent in a matter of minutes.
