

DESIGNED TO ENTERTAIN AT HOME, INSIDE & OUT

The Dometic Home Story

There has never been a more important time to bridge the gap from indoors to out and create solutions that will enhance the way people live, celebrate and entertain at home. Dometic Home allows people to elevate and enrich life's special moments with a premium portfolio of thoughtfully designed products for cooling, chilling and grilling.

LEGACY OF DOMETIC

Dometic, a global leader in refrigeration and outdoor appliances, brings over 100 years of experience creating well-designed, functional solutions for a variety of applications. The brand's expertise in cooling technology, dates back to 1922 when two young Swedish engineers invented the absorption cooling technology, as well as its rich history in developing appliances for compact spaces, offered a natural segway into the luxury residential market.

Leading with the same principles of quality materials, meticulous design, craftsmanship, and expert engineering, Dometic Home's range of products include **wine coolers, wine drawers, mobile beverage centers** and a range of **premium outdoor kitchen appliances and accessories**. Each product is developed to make life simpler, more enjoyable and more luxurious. Ideal for primary or vacation homes, townhouses, condominiums or penthouses, the stylish suite of Dometic Home products creates a seamless transition from indoors to out.

EXPANDING PORTFOLIO OF PREMIUM FOOD & BEVERAGE INNOVATIONS

For indoor application, Dometic has developed a comprehensive range of wine cooling solutions for those that enjoy the occasional sip as well as true sommeliers. From compact to larger scale appliances, the brand leverages its refrigeration expertise to provide the perfect storage conditions for serving and storing fine wines. Available with preset temperatures as well as flexible temperature ranges, Dometic's wine coolers, chillers and cabinets incorporate the latest in cooling technology to expand its range of refrigeration capabilities. For more compact spaces, Dometic's newly available, patent-pending DrawBar offers the functionality of a full-size wine cooler in an elegant drawer.

To expand upon its range of premium outdoor offerings, **Dometic** acquired **Twin Eagles** and its sister brand, **Delta Heat**, in 2021 from engineer and founder Dante Cantal. Founded in 2000, Cantal grew the Made in the USA brand to become one of the most sought-after manufacturers in the space. With a reputation for unparalleled performance and quality materials, Dometic Twin Eagles and Dometic Delta Heat offer a complete range of expertly engineered outdoor grill and

kitchen accessories solutions that combine form, function, advanced technology and luxury aesthetic. Dometic Twin Eagles aims to upend preconceived notions about what a backyard grill is supposed to look like by drawing on the sleek and streamlined geometric structure characteristic of Italian sports cars. The Eagle One Grill is a prime example of this design philosophy, balancing practical function with premium product design. From stainless steel lids to chef-grade hexagonal grates to precise temperature sensors, touchscreen control and wi-fi connectivity, the amenities and features found across the brand's product line takes grilling to the next level. Dometic Twin Eagles has applied this same attention to form and function to its other products including built-in accessories such as the Teppanyaki Griddle, storage, and warming drawers. With its focus on functionality, exceptional performance and longevity at a more accessible price point, the Dometic Delta Heat line of grills and accessories – engineered, designed and manufactured by Dometic Twin Eagles – rounds out Dometic's offerings in the outdoor appliance category. The recently launched Delta Heat Pizza Oven is a prime example of this approach, coupling impeccable design and construction with incredible convenience and reliability to create artisan pizza in minutes.

The brand's new array of **outdoor refrigeration** solutions are the perfect marriage of Dometic's manufacturing heritage in cooling technology and Twin Eagles/Delta Heat's reputation for performance in the premium outdoor appliance space. The refrigerators are designed to keep the inner contents cool with consistent airflow and temperature control without compromising on efficiency and aesthetics. Made with professional-grade materials to withstand all types of natural elements, the seamless integration of the refrigeration options afford units to blend with existing cabinetry or be left freestanding. Likewise, the brand's award-winning, first of its kind mobile beverage centers, MoBar, offer flexible cooling and storage solutions so homeowners can make the most of any gathering.

Whether it's preparing a delicious meal or toasting to a momentous occasion with friends, Dometic Home products are designed to enhance these moments.
