

2022

PRESS RELEASE

Dometic at METSTRADE 2022

Amsterdam – November 16, 2022

"Electrification of the boating industry" is a focus for Dometic's participation at METSTRADE 2022. The new fully electric, advance controls steering system for inboard powered watersports boats, marine gateway IoT solution as well as new power management system will be showcased. As well as the modernization of Dometic's 56 year old Sierra brand which was launched in February at the Miami boat show.

METS 20
TRADE 22

Dometic has a role in the emerging electrification of the marine industry.

Dometic has been pioneering many innovations over the years. Among our achievements, we have innovated:

- Mechanical, hydraulic, electro-hydraulic and fully Electric steering.
- Advanced "drive-by-wire" Canbus electronic shift and throttle controls
- State-of-the-art joystick control system that has revolutionized recreational boating
- Efficient climate control systems

Dometic is the industry's resource for advanced fully electric steering and controls as well as advanced climate control systems.

Dometic has been partnering with forward-thinking engine manufactures, boat builders, and others to create innovative solutions for tomorrow's electric-powered boats.

At this year's METSTRADE, Dometic introduces DAME Design Award nominee, **Dometic Optimus electric steering engineered for inboard powered watersports boats.**

The electrification of the steering system results in a smooth driving and better all-around watersports experience.

 **DOMETIC**

2022

PRESS RELEASE

Other news at the show is Dometic Mobile Power Solution for marine. With the acquisition of Balmar in 2021, Dometic broadened its portfolio with a wide range of new products from monitoring systems, inverters, regulators and chargers as well as solar power solutions.

At METSTRADE 2022, Dometic introduces **Dometic Power Management system** to the global market.

Boating industry is experiencing a demand for connectivity. More and more devices are connected to the vessel for better control, comfort and safety.

With the new **Dometic Marine Gateway**, the brand makes the entry into Internet-based marine telematics market.

This new Internet of Things (IoT) solution from Dometic lets boaters connect, monitor and control multiple devices and digital systems whether onboard the boat or away from it anywhere in the world. When on the vessel, boaters can monitor and control functions via Bluetooth. When away from the vessel, monitor and control functions can be done via Wi-Fi or LTE cellular.

Dometic's tile-based mobile app makes it easy to view status information and control connected devices through any compatible Android or iOS mobile device. The app is designed to be intuitive — swipe on a tile (Batteries, Bilge, Location, Tanks, Security) for a quick devices overview, then press on a tile for detailed device views and control. Simple alert control makes it easy for boaters to set parameters on when and how they wish to receive alerts.

To better define and serve its aftermarket products and service parts, Dometic is introducing an updated **Sierra** brand to the global market.

About Dometic

Dometic is a global market leader in the mobile living industry. Millions of people around the world use Dometic products in outdoor, residential, and professional applications. Our motivation is to create smart, sustainable, and reliable products with outstanding design for an outdoor and mobile lifestyle in the areas of Food & Beverage, Climate, Power & Control, and Other Applications. Dometic employs approximately 9,000 people worldwide, had net sales of SEK 21.5 billion (USD 2.5 billion) in 2021 and is headquartered in Stockholm, Sweden.
